**ITEM 3. FIGHTING PATROL SEQUENCE.**

---

Patrol are addressed by Officer and all papers are handed over (I understand Grenadier Guards badge is permissible, but divisional badges have been removed). The Patrol then proceed to Observation Post, led by scouts, where final instructions are given.

Three men are left to deal with the sentry and enter building while remainder take positions to draw off enemy presumed to be in building. Two shots are fired, the Germans rush out and fall into ambush, meanwhile sentry is overpowered, building searched and prisoner marched off quickly. (Patrol return same way, taking cover, etc. but this is too long to depict.)

NOTE: Not possible to cover unarmed combat owing to bad weather. I understand that Grenadier Guards now wear their badges when going into action, and they were therefore not removed.
