Cameraman's Report.

A. Tunwell. (Silent)

THE MAKING OF STEEL HELMETS FOR CIVILIAN POPULATION.

Shots of helmets being pressed out at the rate of thousands a day. Holes are drilled in the sides to take a lacing which fastens the lining to the helmet.

Shots of spraying of the helmets and packing same.

Shots taken at a distributing centre of helmets having lining fitted and spotters on a roof wearing new type helmet.

Picture taken of old type helmet and new one showing contrast.

(Full dope from Ministry of Home Security).
