	Leblay. Background.	
	He developed and patented a biological process whereby a matter is removed from the Husk, leaving completely iner neverless retains many of the properties of the Rice Pla One of those properties is its high resistance to Fire. Various shots portraying its fire resistance: blb of Butter put under a Cupola and petrol poured on to alight and left burningButter perfectly okay after de Two slabs of Secondite ever a petrol fire not even by Shots of Mr.Secondi hilding a slab touching his face and oxy=acetylene flame endevouring to burn through. A petrol Tank lined with "Secondite" being pierced with flame which is partly filled with Petrol.various shots. Shots of these filters, normally it would without doubt "B is alight around the drum. Shots of Mr.Secondi with a sack of Husks and a slab of s close up and gws of crowd. C.U. Shots of the Fire Brige	t material, which ant. o it and set emonstration. urn marks. d Welder with an oxy-acetylene oured through low up", petrol Secondite.
	Newmane 4" material of the large petrol drum and charged with T I think I managed to get two explosions, but time fuses Shot of the petrol afire after the explosion without a Secondite. I would think that this would be invaluable Close up of the Huske in the sack. Othe r dope attached. Secondite are interested in a copy?Ive told them to phone they want the whole of the material before cutting. Whole of the material was shot in awful light and raine	lining of to any Aircrafto

	the manifold where the carburetter should be, and a shot of the engine running Crowd shots around the car This was a bit of a fraces owing to there being around 300 reporters of all shapes and sizes all crowding around. The car did not run along, but they tell me that they have 10 cars running around on the Continent at the moment. The are really not interested in using it for cars in place of petrol bu just want to demonstrate its capabilities.
