

FLASHES!

Mr. Menzies was received at the East Molesey Cricket Club by Sir Pelham Warner. The Australian Premier came to lay the foundation stone of the new Pavilion, for which Australia is giving all the panelling wood. Incidentally Mr. Menzies is a life member of this famous club, where cricket was first played in 1695. - that is 260 years ago. Work on the new stand has begun and the model shows what it will look like when it's finished. East Molesey thanks Australia and her Prime Minister.

Milk continues to be in the news in France. It's gone so far as to invade the army. The Premier is so alarmed by the amount of alcohol ^{France} ~~the nation~~ is drinking he's decided to train young soldiers to like milk instead.

What effect it'll have on the nation's fighting blood time will tell. ^{In a dairy to attract 4 of average} ~~It may turn out that you can take France~~ ^{then she'll still prefer wine!} Yes, really, you can have this stuff, thank you very much.
