

CAMPBELL TRIES OUT BLUEBIRD

Ullswater. Engineer-mechanic Leo Villa, longtime assistant to Sir Malcolm Campbell, now tuned up Bluebird for son Donald, ~~Campbell~~. He found the Metro-Vickers turbo-jet in very good ~~shape~~ *trim*. All set for ~~launching~~ *christening - by Mrs. Campbell*, Mrs. Campbell ~~christened the speedboat~~. For the first of what he says will be a long series of tests Donald eased himself into the cockpit. £25,000's worth of hydroplane, specially designed to wrest the world water record from the American Stanley Sayres. 178.49 m.p.h. to beat!

102

Only slow runs were attempted, to see how she handled. Extremely satisfactory was Campbell's verdict.
