

269  
AUTO-GYRO JUMP START.

The latest development in the air --- the new jump start ~~machine~~ plane which takes off without any run at all. It is able to make a jump of over 30 feet. Steady in flight, this machine is able to land on the proverbial sixpence, owing to a system of sloping hinges on the overhead rotating propeller. Notice in this phenomenal landing how the pilot seems to be able to put the brakes on in mid-flight.

LOCARNO.

Lord Halifax for Britain and M. Corbin for France were the first to arrive at No. 10 Downing Street for the Three-Power Locarno Talks, and they were closely followed by Mr Anthony Eden and Sir Robert Vansittart. For the Third Power --- Belgium --- there were Baron le Cartier, M. Spaak and M. van Zeeland. M. Delbos the French Foreign Minister was there too and photographers turned out in great force to snap the irrepressible M. Blum, France's Socialist Premier. The object of the Locarno Talks --- oh, peace in Europe, you know.
