

CULTON BROAD.

One of the most exciting sports in the world --- speedboat racing brings together a combination of shimmering waters, ~~and~~ flying spray and human daring ~~that is~~ fascinating to behold. Twenty-four entries flashed over the sparkling surface of Culton Broad in a twenty-five mile dash. At the cornering buoys look for a thrill a minute --- each driver blinded by spray from the one in front --- No 19 won ^a ~~this~~ thrilling race and the world's largest speedboat prize.

On the roads at Donington Park --- no less picturesque and every whit as thrilling as the water variety --- drivers race their cars through the lovely parkland --- the only road-race ~~in~~ ~~England~~ ~~sees~~ ~~we~~ ~~had~~ ~~at~~ ~~anything~~ ~~over~~ ~~100~~ ~~miles~~ ~~an~~ ~~hour~~ ----- Watch now for a last-minute shock as Austin Dobson lost a wheel. ~~Steel~~ wrist --- iron nerve --- pulled Dobson out of the tightest corner he ever knew ---- that was a wheel!

FLYING AT LYMPNE.

The world's most daring flyers met at Lympne for the international air rally. A special item by the R.A.F. included three planes flying tied together. M. Noel Coward looked on at this display where pilots risked their lives a hundred times a minute --- The only difference between stunting at 5,000 feet and stunting at 50 feet is that at 5,000 you have time to wish you hadn't. Now the most amazing --- Ken Waller flying a machine built in 1912. In those days every time a man went up in a 'plane the local undertaker used to brush his ~~hat~~ top hat.
