

## NAVAL MANOEUVRES.

H.M.S. RODNEY AND NELSON were two of the capital ships engaged in exercises off Invergordon, and our cameras take you aboard these giants of our much discussed, sometimes under-estimated and always supreme Navy. Anti-aircraft practise forms a generous part of sea manoeuvres ~~thruout~~ to-day --- carried out with live shells and a target towed behind a 'plane.

Here too we have the destroyers in action --- ~~H.M.S. Bellona and Escapade and Escorteer.~~ Watch these devilishly efficient little craft launch a giant torpedo -- ~~an amazing action picture of thousands~~ ~~thousands of pounds' worth of sudden death let loose at 32 knots.~~
