

BUSH FIRE.

305

New South Wales ---flying above the Blue Mountains of Springwood and Glenbrook our Roving Cameraman secured these pictures of a bush fire ravaging the countryside. Homes destroyed --- and damage running into many thousands of pounds.

BRIDGE.

California --- work is nearly completed on the San Francisco Bridge -- 4,200 feet of deck between the two towers 746 feet above the water. Unusual feature of the work is the safety net which cost 100,000 dollars ~~and~~ ~~is cheap at the price~~ --- ~~it~~ has already saved more than a dozen lives

QUADS.

One whole year upon the merry-go-round of life has brought Britain's Quads into cherry-ripe infancy. ^{picture} This is a Gaumont British News exclusive ~~story~~ introducing once again ^{Anne} Ann, the only girl of the four --- Ernest --- who was going to say something but can't think what --- Paul, also in a serious mood --- and Michael ^{waiting for a seal of approval about his distressed area} --- ~~and now for the first~~ ~~birthday party~~ ^{area} Now for the cake --- and if they don't set fire to the place or cut their heads off it ought to be lots of fun. ^{Here comes Harrison} Of course, they're too young to eat the icing, but it makes ^{the most} marvellous hair-~~oil~~. Even the best parties come to an end and it's time for bed at last. So say good night to Paul and Ernest. Anne is still full of fun as usual. [^] Before going to sleep she has to play knock knock with Micheal.
