

GOLF MADE EASY.

When the professionals play golf it always looks an easy game but actually it requires a certain amount of skill in addition to a lot of luck and a double scotch. Sir John Simon has invented a ball that squeaks when lost, but G.B. News have gone one better with a ball which, when driven into a bunker, struggles tooth and nail to get out. Our ball alighting in casual water swims madly for the ~~shore~~ shore. Bobble-obble. The G.B. News ball driven into the rough not only calls for help but also jumps up and down and whistles. (Whistle Our golf ball used in the Ryder Cup and the Walker ignores the fact that America nearly always wins and remains patriotic to the end. The G.B. News ball shows at its best on the putting green. Even the crack professionals miss a putt now and then, but by means of our remote control wireless set our ball never ~~misses~~ misses. Best of all is the G.B. News ball --- even the toughest of the ~~rough~~ tiger country cannot get it down. Play with our ball and ~~the~~ all the best clubs will throw you out. Ha! Ha! Ha! Good-night.
