

MOTOR CYCLISTS.

A new type of motor cycle on parade in Detroit --- a fleet of sixty to carry on the work of catching the bandits of the underworld and pursuing the speeding ~~motorist~~ motorist. They are capable of a speed of 100 miles an hour, so they need those wind-shields. That's travelling for business. For pleasure the 15th Cavalry Regiment at Paderborn held a fox-hunt to catch the bandit of the undergrowth. In this case it was a drag-hunt, and hounds ~~instead~~ instead of hunting a live fox, hunted a lively smell. It sounds about as much fun as looking for an escape of gas.

And another way of travelling for pleasure was demonstrated at the Paris opening of the Palais du Ski. The track is ~~hypoxia~~ hyposulphite --- and the experts performed on purpose a lot of the tricks which the non-experts do just as well by accident.
