

RUSSIAN AIR DISPLAY.

419

Fighting planes by the hundred roared over Moscow Air Field when Dictator Stalin watched a mass parachute descent ~~by the Soviet Air Force~~. Planes by the hundred and men by the score of hundred --- swarming on wings like an army of locusts. Modern military strategy in Soviet Russia always includes the dropping of infantrymen behind the ~~lines~~ enemy lines by parachute --- and here they ~~go!~~ ^{So!} Whole platoons and companies ~~dropping~~ ^{raining} from the skies. And when the descent is accomplished the sky is darkened once again with rank after rank of bombers --- ~~Russian millions in the air!~~

TERUEL.

The focus of world attention shifts back from China to Spain. Teruel, in which a Franco garrison was besieged ~~for many weeks~~, --- while civilians looked upon the familiar spectacle of war. During the evacuation ~~times~~ rebel planes continued to pour their bombs upon the outskirts held by the Government Army --- neighbouring villages also came under the hail of high explosive. Later reports said that Franco had recaptured Teruel --- this was denied by the Government. One thing is certain --- whichever side is winning battles, Spain is always the loser.
