

442
BARCELONA.

Barcelona --- no need to give the name of this city in Spain --- the trail of wreckage speaks all too loudly. Government buildings, business offices, cafés, hotels --- all look the same after these devastating raids by the Franco bombers. once more there is talk of stopping this brutal destruction. Let us pray ~~kk~~ that this time it will not merely end in talk.

REFUGEES.A

Port Wendres --- on the French side of the Spanish frontier hundreds of refugees have been crossing into neutral territory. French cruisers brought to safety these objects of pity from a war-ridden land.

LLOYD GEORGE.

Paris --- Mr Lloyd George, looking as well and as vital as ever, spent a few days in the French capital. At the Invalides he paused in silent contemplation by the chapel wherein lay the tomb of Marshal Foch, leader of the Allied Armies in the Great War. ~~He placed a wreath on the Foch memorial.~~

SMALLEST MOTOR.

Rome --- a young Italian mechanic names Tomassini claims to have made the smallest electric motor in the world. Its horse power is 0.0008 and it does 25,000 revolutions a minute. Compare its size with a stamp ~~or a finger nail~~ --- and marvel at the wonder of modern science. An electric motor too small to be any good to anybody.
