

L.M.S ENGINE.

495

Apsley --- a novel ceremony marked the opening of this new Hertfordshire station between Hemel Hempstead and King's Langley. Lord Stamp the L.M.S Chairman punched the first ticket. The railway company built this new station because of the ~~large~~ recent large increase in the local population. It's awfully decent of them, because it's not their fault.

MT. VERNON.

Northwood --- Miss Anna Neagle the famous British film star, attended the Garden Fete and Fair in aid of Mt Vernon Hospital for Cancer Treatment and Research. First, she did the usual thing. What happened after that suggests that Miss Neagle's next part ought to be Boadicea.

AUSTRALIAN CRICKETERS.

London --- The bigger part of the Australian test team left St Pancras for Tilbury and the journey home. Hassett, Fingleton and O'Reilly had good-byes to say but Fleetwood-~~xxx~~ Smith was travelling with his wife. O'Reilly, Chipperfield, Walker, Fingleton --- they've all had a grand time and they've kept the Ashes --- but they say they'll be glad to be down under again.

DAM.

Montana --- More power for the West. A huge new dam has made another Niagara for the cowboy country. It's a rainbow creak of gold --- and the Indians on whose tribal lands it is built have been promised $7\frac{1}{2}$ million dollars. That's why they're happy beside their 77,000 horse power giant.
