U.S.A. MANOEUVRES.

These pictures, at first sight, suggest an invasion from Mars. But in reality, they show Uncle Sam's 66th tank division in battle manoeuvres at Fort Meade, Maryland.. Nothing can stem the headlong progress of these inhuman monsters, as they make a ruthless furrow across land and water. Through the smoke screen into the turmoil of war- only make-believe war. Infantry, in gas masks, advance under cover of these deadly weapons of a mechanised age. The coming of night brings to these unearthly creatures a weird significance, more than ever ^{as they seem} like the denizens of another world.
