ALBANIA AND PRAGUE

Once again the civilized world stands breathless at the latest coup of the Axis Powers of Europe --- Albania has been taken under the protection of Fascist Italy. That means that warships, troops and bombing planes have crossed the Adriatic and another name has been crossed off the map. King Zog has fled and his twenty-three year old wife Queen Geraldine suffered a nightmare journey to Greece when her baby was only two days old. Now look at Czecho-Slovakia, which has received the protection of the German Reich. Protector von Neurath arrived in Prague, and these pictures tell a story more graphic and vivid than any words could conjure. ~~Czechoslovakia~~ nation's capital has become Teutonized --- it might easily be mistaken for any ~~other~~ large city in Germany itself. It shows that a protector wears hob-nailed army boots. It shows the handiwork of a strong man --- Britain must be stronger to preserve the Empire's liberty and freedom.
