JAPANESE VOLCANO. ✓

History repeats itself- just as much in volcanoes as in <sup>any thing</sup> ~~world~~  
~~was~~ <sup>else-</sup> Here are amazing pictures of Japan's famous crater of  
Sakurajima, quiescent since 1914, bursting into its most violent  
eruption in a quarter of a century. Nature stages one of her  
most terrifying shows- spouting smoke and lava 3000 feet into  
the air.

ABORIGINAL DANCE. ✓

I'm sick of all this sort of thing- Can't we have some  
modern dancing for a change?
