

FINLAND.

Hopelessly outelassed by the tiny Finnish army, Soviet Russia has fallen back upon its great fleet of air-bombers to swing the tide of victory. Finland has scarcely any air force at all; so the Russians send over theirs with comparative safety; and this is what is hapenning to the defenceless towns. As many as four hundred planes in one day have bombed villages and towns and coastal defences

But the spirit of Finland rises like an inspiration --- their great little army ~~skilixamixkxent~~ has scored victory after ~~vixta~~ victory in the first weeks of war. Tanks captured and scores of thousand s of Russian dead testify to their marksmanship.

So the wonderful Finnish troops have gone from one victory to another ----- but the odds are so heavily against them

On all sides there is evidence of terrific punishment. Viborg has suffered not only from aerial bombardment but also from long-range artillery fire. Still, Finland hits back with all the planes she has and here is a Finnish bomber loading up. Yes --- it is Finnish, in spite of the swastika; that happend to be the symbol of the squadron; ~~The Finnish bomber takes off to seek revenge against even the Soviet bases.~~
