

NEW ZEALANDERS IN EGYPT:

644

Wings over Cairo! While the New Zealand troops are training in their desert location our camera flies above the great Egyptian city out to the Pyramids, in a service bomber the desert itself has become a battleground for the Empire's Dominion troops on manoeuvres. Thousands of lorries in Convoy bring up supplies and ammunition --- and then --- New Zealand goes into action. There's fire and there's dash about these brothers of ours from the other side of the world. Anti-tank guns under camouflage --- every unit of the Empire's army has the latest and best equipment ---- and they all know how to use it. Thousands of men and ~~thousands~~ thousands of tons of guns and ammunition stand guard for the Allies in the Middle East. Light tanks and Bren gun carriers play their part. The new ship of the desert is stately and terrible ----- and it can do everything a camel can do and a lot more. ~~New Zealanders~~. Arab troops form part of the greatest chain of armies standing to arms in defence of liberty. The mightiest parade of these ~~thousands~~ native soldiers since the days of Allenby --- they too are a token of the great forces that are resolved upon the overthrow of Nazi tyranny.
