

667
QUEEN AND M.T.C.

The Queen inspected a contingent of women members of the Mechanical Transport Corps in the Gardens of Buckingham Palace. Three of the ambulances were presented by Hollywood film stars. This unit will be attached to the Belgian Red Cross B.E.F. IN HOSPITAL.

Once again after twenty two years we have the spectacle of men in hospital with new war wounds. Our own Tommies from France and Belgium --- and a Belgian too, with the tin hat that saved his life. The one consolation in these pictures is that surgery has advanced in twenty years --- the sufferings of the wounded are reduced to a minimum by the care of the great medical service of Britain.
