

WHAT TO DO IN AN AIR RAID.

668

In the event of an air raid, it is essential that you should observe these simple rules. Get under cover at once. Don't stand staring at what may be happening in the sky. Don't panic, and don't rush. Take cover quietly, and others will follow your example. If you are in the open far from cover, lie down --- and keep down. If your home is within five minutes --- go home and stay there. Be careful to keep away from windows. Admit people who may be passing --- they need shelter too. Motorists must get off the main road --- and park near the kerb. If it is night time, switch off your headlights, leaving on sidelights and rear lights. Always carry your gas mask. See that the blackout is complete in your home, your shop or your office. And above all once again --- don't stand staring at the sky. Get under cover at once.
