U.S. LINER.

Flagship of Uncle Sam's merchant fleet, the new stream-lined liner "AMERICA" makes her maiden bow in New York Harbour.

She is the largest, fastest, and most luxurious vessel ever built in the States and she gets a tumultuous welcome.

Over 720 ft in length- this Colossus of the ocean cost 17,000,000 dollars and is the last word in palatial equipment. Built for the North Atlantic service, America's greatest ship lies proudly at anchor against the skyline of Manhattan.

The Nation salutes America's new Queen of the Seas.
