

INDIAN AIRMEN ARRIVE.

707

The Royal Air Force grows day by day --- not least through reinforcements from the ^Empire Overseas. Latest arrivals in Britain are these pilots from India who have come in loyalty to the King Emperor

MINISTER OF SHIPPING.

The Minister of Shipping paid a visit of inspection to one of the largest shipyards in the North of England, and he saw, ~~what~~ ^{that} ~~has been achieved anywhere in Britain today.~~ Work is going ahead on war business with unabated zeal and energy. Mr Ronald Cross also ~~made a trip by launch,~~ [✓] and he noted with satisfaction that this busy river is entirely undamaged by enemy attack

ST PAUL'S.

The Nazi airmen may chalk up what they no doubt consider ~~quite~~ a big success --- they have caused a small amount of damage to St Paul's Cathedral. A bomb entered the roof near the ~~big~~ big dome and brought down masonry from the inner roof, wrecking the high Altar. This is a German triumph --- but it isn't the way to win a war.

SUB? BOMBING PRACTICE.

News from one of our cameramen with the Fleet --- somewhere at sea where the enemy would like to be if we were only somewhere ~~else~~ else. Small guns from the warship combine with Fleet Air Arm bombers in a spot of practice against submarines. In the intervals of sinking German and Italian submarines, they like to keep their hand in with rehearsals for the next time.
