

KING AT SOUTHAMPTON.

The King paid a visit to Southampton following the severe night raids directed upon the city by Hitler. Look well at these pictures; observe how they --- like the bombings of London and Britain's other great cities represent the wanton cruelty of a savage race. It is indiscriminate murder --- the attempt to break a nation by striking at its women and children. ~~These pictures and resolve more firmly than ever that Germany must be utterly defeated.~~

U.S. PLANES FOR BRITAIN.

More help for Britain. More bombers built in American ~~factories~~ factories bear the famous rings of the R.A.F. They are ready to fly east on the first stage of their journey to the British Isles. More striking power against the tyrants of Europe.

ROOSEVELT RE-ELECTED.

That's the winning smile. The first newsreel pictures to reach Britain after the election of Mr Roosevelt as third-term President. They've been a long time coming over. You guess, perhaps, that they were delayed by ~~the~~ acts of war, but no! The cameraman went to an election party and it's only just over.

EVACS. IN AUSTRALIA.

Another batch of British children safe in Australia; after weeks at sea. But though they are far from our bombs and guns they are still a part of us --- and they carry a noble message to the Commonwealth of Australia.
