

PAY DAY FOR A.I.F. IN EGYPT.

We've heard and seen a lot of how the Australians are stirring up the Italians in the Western Desert. Here's a picture from behind the lines. Pay day ---- and that's a fine day in any country.

Back home in Australia there's an abundance of signs that the war effort of the Commonwealth is getting up into top gear. *Recruits to* ~~Men~~ of the Royal Australian Air Force march through Brisbane --- part of the steadily-swelling stream of fighting men from all *the lands* ~~parts~~ of the Empire.

Now to Canada --- another parade....but this one is a bit different. It's a march through Toronto helping to boost the War Savings Campaign. Across the world our people are saving and lending for victory. It's a darned expensive war --- it'll cost us most of our money to win it. But it'd cost us the lot to lose it so who wants money?
