MASSING THE SUPPLIES FOR BRITAIN.

~~These pictures were taken at~~ A port in eastern Canada --- supplies about to leave for Britain on the Bridge of Ships between the new world and the old. All sorts of war commodities coming over to help sustain the old country in the fight --- from warplanes to bacon --- from flour to aluminium.

Ton upon ton of cargo loading up to remind us that it's a whole Empire fighting Hitler --- not just a little island in the North Sea reminding us that it's worth while putting up with present inconveniences to preserve the Empire for the future.
