

THE NAZI AUTOMATON OF DESTRUCTION.

Herr Himmler, the chief of the German Gestapo has made a statement; he said that every German girl has a war duty which has nothing to do with marriage: that is, to become a mother by soldiers going to the front. Germany wants to be sure that in Twenty years' time there will be plenty more German sons --- to do this. This is the glorious privilege for which German women are ordered to breed.

This generation of Germans does its life-work well; scarcely anything in view on the whole wide landscape except ruin, misery and chaos.

The fields of corn were made by God to feed His children; the senseless jackboot of a German tramples it into the ground; the swaying stalks conceal an army of murderers awaiting the chance to kill. How many years will it take the world to put this right? How many years will pass before we can make good the years of waste?

(Ration Hog)

~~This film was made as German propaganda; for as it is an object lesson.~~ Millions of gallons of petrol, millions of tons of steel; the work and sweat of thousands of pairs of hands crushed by opposing gigantic armies into uselessness. How many years of toil ~~will~~ before they can be replaced?

(Mr Slacker)

Scores of tanks in a fight; hundreds of tanks in a battle; thousands of tanks locked in a death-grip over a front of 2000 miles.

How many more do you think we shall need for victory? ~~How many hours are British workmen working now to give us the tools of victory? How many men are letting these workers down?~~ *How many hours are British workmen working now to give us the tools of victory? How many men are letting these workers down?*

How many other are letting these workers down? (P. B. WINTER)

THE NAZI AUTOMATON OF DESTRUCTION. (2)

Look at the depth of ~~Russia's~~ ^{Soviet-} sacrifice. To a man they turned out in defence of their homeland; thousands have died and ~~thousands~~ ^{many} are captured: little girl, let's hope you forget what you see.

~~Now it's the turn of the Luftwaffe. Once again the German camera glorifies the man who started the game of dropping bombs on children. This is an attack on a railway.~~ When you read of Soviet armies resisting do you forget the heavy blows that are struck at them? Don't think the Soviet Union will save us the trouble of smashing Germany.

~~That~~ German soldier --- you look so foul! You look sub-human; You are just an evil machine for spreading destruction and slaughter --- vice and disease and starvation. But you are an efficient machine; Your equipment has been designed by men whose whole talent has been dedicated to the business of mutilation and murder.

Soviet troops have blown up bridges to stem the German advance: but the trade of armies is concerned with the overcoming of obstacles. And now the Luftwaffe goes into the attack on the town.

This was the advance on Minsk and Baranovitch. Artillery hammering a path into what ~~was~~ ^{were} recently busy, peaceful towns.

The defence is silent; the great German army marches forward into another conquered City to reap the glorious harvest of the battle!

At the glorious harvest of the battle!

THE NAZI AUTOMATON OF DESTRUCTION. (3)

Crashing upon those heartrending sobs you hear the shriek of human passion; everywhere the Nazis go they sow the seeds of hatred and distrust ~~and~~: ~~^~~ this is Greater Germany resurrected --- the nation that taught treachery as a virtue ~~to the children~~ 1.

That's all there is. And that's about enough. Molock marches on, crushing beneath its steel-clad wheels the frail bodies of the human race. This is the film sent out by Germany to tell us about German culture. Crime --- and filth --- the code of the reptile underworld. This is what we're fighting. This is why we need the strength of supermen
