

U.S.S. INDIANA.

826

America launches her third 35,000 ton battleship for 1941, and it's the fifth since the U.S. Navy expansion programme was begun. There's a lot of work to be done on a battleship after the launching before she's ready to join the Navy --- but the launching in this case is six months ahead of schedule. <sup>^</sup> America's going all out for that two-ocean Navy --- and the latest recruit is here ---- U.S.S. Indiana ~~\_\_\_\_\_~~

NEW U.S. TANK.

Another new type of tank from American factories. It's a tank destroyer; it needs to be nippy for a job like that; and you can see it is. <sup>at slow speeds you can study the action of the wheels</sup> Almost any kind of country at sixty-five miles an hour: <sup>but it can work</sup> that's a performance that takes some beating ~~\_\_\_\_\_~~

MALAYA STANDS BY.

3.45 P.M.  
2/12/41 M. S. Jones

More pictures from Malaya --- a vital Archipelago in the complicated Geography of World War. Strong post of the Far East; Singapore guards the sea routes to Australia, India, and China. It is the greatest naval base in the world; no wonder we keep sending reinforcements there. No wonder all Malaya stands by when Japan threatens war. ~~\_\_\_\_\_~~
