

HIGH SPEED TORPEDO BOATS OF THE NAVY.

958 430 P.M. h. Bertha /
9/3/43

The most deadly and powerful single weapon possessed by the world's navies is the torpedo; at shore stations much of the servicing work --- and repair and overhaul to practice torpedoes --- is done by the Wrens. This particular station is attached to Coastal Forces --- the little ships of the Navy: the M.L's, M.G.B's and M.T.B's ~~and~~.....and this is a small part of the story of the last --- the Motor Torpedo Boats. Most of their work ~~is~~ is done at night --- but this ^{is} daytime training. Your imagination perhaps can picture the lonely little expedition that goes out into E-Boat Alley in the black night; escorted by motor gun boats armed to the teeth; an enemy convoy is passing close and the M.G.B's shoot up the escort; ~~of course~~; these are the craft that go roaring in to slip a tin-fish into Hitler's sea-borne supplies ~~and~~

We don't hear much about coastal forces; think of them on the next dark night --- they're little ships doing a big job. ~~and~~
