MORE LEASE LEND FOR RUSSIA.

Further evidence of the great mass of war material reaching the Soviet Union from the United States; a port somewhere in Iran where the quays are piled high with every kind of goods. Food --- lorries, cars, tanks, planes guns and ammunition; silent witnesses to the pledge of the United Nations to stand together till victory. Trucks in convoy roll in endless columns across the Iranian hills; one of the routes to Russia to supply the great needs of the great Red Army.

Back in America --- off the eastern coast. Test of a new helicopter which is entering the war against the U-Boat. A twenty foot square painted on the deck of a tanker is the chosen site for this demonstration. This helicopter can fly forwards, backwards and sideways and drop bombs with almost 100% accuracy. It will be able to operate from an ordinary merchant ship --- every merchantman will be its own air escort.
