

SUPER JEEP.

Everybody knows the Jeep; even in Russia they use thousands of them under the name of weelies. Now there's a new super-jeep --- bigger and better ~~Trained~~ to go over rough ground like a mountain goat --- and butt the troops in the pants. *A* *uu*

SALT MINES.

Twelve hundred feet below the surface, the world's biggest salt mine is working for the Allies. It's in Nova Scotia, Canada. Human beings cannot live without salt in some form; and besides it gives you a thirst.

Geologists have stated that this salt was deposited here twenty-seven million years ago. That's a long time to wait for some one to pass it.
