

Malaya Territorials

Malaya - where army volunteers take part in an anti-Terrorist operation. A tough manoeuvre that gives them a taste of the real thing. But the ~~men~~<sup>troops</sup> were disappointed - they didn't bump into any terrorists.

The men (who came straight from civilian occupations) were undergoing a two-week course in Malaya's first post-war training camp. ~~And~~<sup>And</sup> after their ~~concomitant~~ training, the G.O.C. Malaya, Lt. General Stockwell congratulated them on their drill and bearing.

Wingless plane

California - where a wingless plane prepares for its test flight. Yes, wingless we said - just watch!

The extensions fold into the fuselage - and tail-flaps get the plane airborne more quickly than a conventional craft.

All set for take-off - the first since a ~~disastrous~~<sup>failure</sup> test a year ago...

And she flies. Just to make more people think that they're seeing those things again!

Morocco demonstration

Spanish Morocco - and a visitor to the Capital, Tetuan, is Lt. General Garcia Valina - the Spanish High Commissioner, ~~he~~<sup>He</sup> received a Petition, ~~signed~~ signed by Moroccan notables, in which they repudiate the authority of the present Sultan. ~~Down~~

They also asked that the Khalifah, the Sultan's representative, be given Sovereign rights over the Protectorate. Then 30,000 Moreccans took part in a demonstration - pledging their continued loyalty to Spain.

Kitchen of the future

New York - where at a <sup>Household</sup> Show to-day, they're displaying the kitchen of tomorrow. ~~At~~ A press button dream come true for the housewife - the refrigerator opens ~~at a touch~~<sup>AND CLOSES AT A TOUCH</sup>.

And the tall girl gets an adjustable table.... No more back-aches. No more frantic searching for the toaster at breakfast-time. It's always on the spot...

A wave of the hand - and down comes the hidden kitchen cabinet - complete with dishes. Mother will be looking for that fairy Godmother next.

What about dinner? Well, <sup>pusher</sup> a touch, and ~~it~~ it comes into view. For a newly-wed - it's <sup>even</sup> easier than using a can-opener!
