

Triplane story

America: Making triplanes for the masses - was the get-rich-quick idea of George Frisbie of Wisconsin. First, he built a test model, that certainly looked O.K., anyway... (3)

Then came a set-back - George found that his plane just wouldn't fly... Now, he's revising his plans - still determined to prove that "triplane transport for all" is no idle flight of fancy..

U-Boat War Memorial

Chicago: Living again, a war-time Naval epic, U.S. Sailors, under their Commander, Admiral Gallery, board the U-boat they captured in the Atlantic ten years ago...

The German submarine is to become Chicago's permanent war memorial, and these are actual films of her capture. First - depth charges forced her to the surface...

The Admiral then led a boarding-party which captured the crew and closed the ~~xxx~~ scuttling valves. So a prize of war becomes ~~the~~ memorial of peace

Plane Catapult

In Pacific waters - the U.S. Carrier "Hancock" <sup>tries out</sup> ~~tests~~ the new steam ~~catapult~~ catapult. One of the most important Naval developments since the war, it is being fitted to all <sup>American</sup> ~~the~~ carriers.

Invented by Britain, the steam catapult has a stronger driving power than the old hydraulic system - making it possible to launch heavier and faster planes..

Hollywood weight-lifters

Hollywood: Bulging biceps take the strain, as ~~strong~~ muscle men, from all parts of America, compete in the National Amateur Weight-Lifting Championships. <sup>And by the look of them, they could show the</sup> ~~So the last thing you should call them is~~ Professional strong-men <sup>a thing or two.</sup>

Just chaps with a heavy date! (2) That one let him down! One minute you think you're strong - then you come down to earth - with a bump.... <sup>But when you're good - boy - you're good!</sup>

~~One winner was Bert Elliot.~~

Going Up!
