

Flashback

Following Bus story:-

Now here's to-day's flashback

AND IT WAS IN 1933, THAT THE first non-stop electric train ~~service~~ ~~and~~

Brighton was again the destination. *run from London to Brighton.*

Britain ~~took~~ *had taken* her first major step ~~to~~ *in* modernised rail transport. &

A non-stop fifty mile journey made within the hour.

Electricity was ~~the~~ *to be the* ~~proved~~ successor to the age of steam. ~~Twenty five~~

years later, ~~British Railways have announced plans for nation-wide~~ *are going ahead with*

~~electrification.~~ *and today -* over a thousand miles of British railways

have already been electrified.

How many 100 miles of B.R. are electrified?

Just over 1000 miles -

(per Pass Office, B.R.)
