JOINING THE W.N.A.F.

The girls of Cairo, Alexandria, Jerusalem and points Middle East are answering the call for enrollment in the W.N.A.F. Recruiting depots are doing big business way out there where men are men and women are not far behind.

A fresh batch of recruits are shown their new quarters. Rather like going to school for the first time.

Turns out to be a nice friendly place. One moment a cigarette and then it's "No Smoking" by order. From the equipment store they draw their service kit. And there's a nice feller there to ask you what size you take.

These high heels are coming off for the duration. The transformation scene, where footwear and hair styles are altered and training commences in earnest.

Three weeks back they thought "right dress" was a fashion tip. Today this smart turn-out is the vogue.
