BOTTOM-SIDE UP.

New Construction methods in use at Shipyards on America's great lakes, To save time and money, they build their ships upside down in a cradle. In due course they roll the vessel over on its hoop-like ring in time for the launching.

This part of the proceedings is entirely orthodox. In narrow waterways they launch them sideways. The Slippery slope to the edge... the plunge into the water, and another ship is added to the United States Navy.

CHINESE IN CANADA.

The Chinese population in Toronto, parades in honour of BOCK YA HWANG, Generalissimo Chiang Kai Shek's envoy to the Dominion. Chinatown really lets herself go.

With traditional old-world ceremonies, Chinese patriots living in the new world dedicate their lives to the downfall of Japan.
