"V" 2. DAMAGE

Using stratosphere rockets dropped on us from 60 to 70 miles up, Germany is engaged in another form of terror raiding. To flying bombs is added "V" 2. - another wholly indiscriminate weapon used as a morale-booster for the German people. It's the truly typical effort of the mortally injured Nazi beast to attempt to tear down everything as he goes under.

Travelling faster than sound with a warhead weighing a ton, "V" 2. descends at something like 2,000 miles an hour. People of Southern England are enduring this latest ordeal just as they took the blitz, the fire raids and flying bombs at their worst. But by heavens there'll be some voices raised if the "let's-be-nice-to-the-Germans" clique obstruct the day of reckoning.
