Speech continued.....

" ~~In Scotland we want our rural areas to be equally flourishing and equally favoured.~~ "

Everyone will, I know, join with me in expressing the warmest admiration to those whose vision, tenacity, and technical skill have welded together in facing and conquering so formidable a task.

From this great enterprise on the banks of Loch Lomond will henceforth pour a stream of power bringing widespread benefits to the cities which it is to serve. No less compelling is the need of the villages and glens.

In Scotland we want our rural areas to be equally flourishing and equally favoured.

| 6. SV Queen seated, gets up and starts speaking... at end of speech pulls lever | 280 |
| <p>"I can assure you, Mr. Chairman' that it gives me very real pleasure to be present at this memorable ceremony, which all Scotland has awaited with eagerness, and today watched with pride and acclamation. You have given us a vivid account of the benefits which this mighty scheme is bringing to the people and industries of Scotland and you have rightly reminded us that the building of it have been completed under conditions which have often meant considerable hardship for those living and working on the site.</p> <p>① [Everyone will, I know, join with me in expressing the warmest admiration to those whose vixixix vision, tenacity and technical skill have welded together in facing and conquering so formidable a task] Their reward will be to see new strength surging into the very arteries of Scotland's being.</p> <p>② [From this great enterprise on the banks of Loch Lomond will henceforth pour a stream of power bringing widespread benefits to the cities which it is to serve. No less compelling is the need of the villages and glens], and for them cheap electricity will be a lasting boon for it will bring to them those who live in faraway places the comforts and facilities which have hitherto been reserved for the large centres of population. ③ [In Scotland we want our rural areas to be equally flourishing and equally favoured.]</p> <p>I am therefore very happy now to inaugurate this great service in electric power and to declare the Loch Sloy Scheme open in operation.</p> | |
