KOUDEHORN 8

FORMER FRISIAN SIAMESE TWINS ONE YEAR OLD.

Length: 40 Metres
November 8th 1954.

"Tjitske" and "Polkje", two children-heads, two names which have gained fame, all over the world.

Do you remember them ?

Tjitske and Polkje de Vries were born as Siamese twins on November 8th 1953, and were separated successfully in the summer of this year by Dutch surgeons.

Since long they are not the "patients" they once were; in the contrary, they celebrated their first birthday as two rosy, healthy little girls.

Father De Vries is very proud on them, their grandfather and grandmother too.

The rubber toys, some of the many birthday presents the twins got, did not make so much effect as the givers had hoped for.

Mother De Vries is very happy with the two fair babies, with which her family was enriched.

Little by little they learn how to stand on their own legs, together they learn how to go, how to talk....they are in all respects alike.
