

"THE WINDY CITY" LIVES UP TO NAME.

Fierce gales sweep America and Canada causing several deaths and wrecking property. Damage is soon totalling many millions of dollars as the gales continue their rampage of havoc.

Chicago lives up to its nick-name "The Windy City" and icy pavements make a giant skating rink of the place. But the man with the mail - sees that the female gets through. Winds of up to ninety miles an hour bring the less hardy to a standstill, or use them like a Scotsman's curling-stones.

The Windy City puts its citizens down for an icy count in the worst Spring gales for years.
