Paris November 5, 1956

THE HUNGARIAN REVOLUTION

Dupontegative Developed : 612 meters = 2,040 ft
(in two parcels)

These extraordinary films of the beginning and first fights in the Hungarian revolution in Budapest were made by cameramen of PATHÉ JOURNAL in Budapest.

We were able to send one of our men to Budapest who succeeded in getting through to Vienna.

These films beginning by the peaceful students demonstration which was at the origin of the entire events, show the immense crowd following and cheering the demonstrators. Towards the end of the demonstration people from every stand of life are in agreement with demonstrators as these pictures will show.

On the big Staline Square where the national flag was hoisted on the Hungarian 1848 revolution here LOSTUPH, in front of the Ministry of Interior where are the hated AVO organization squads (AVO, secret police organization), firing began and this was the beginning of the tragic events as the crowd got mad and soon found arms against AVO men and it was only later that anti-russian action began

At first the Russian soldiers fraternized with Hungarians but as they tried to protect the hated AVO men, the Hungarian people also voiced their anti-russian feelings.
