GIGI SETS THE FASHION.

The story of Gigi has taken the town by storm; naturally the world of fashion follows suit. From girl to mature woman, Gigi's gowns are an inspiration. Toffee apple is the name of this summer dress in apple-printed cotton. Modelling it Dawn makes it look as sweet as the toffee apple itself. In soft Swiss Cotton, a sleeping-suit, designed for the modern version of Gigi. It's in Sapphire Blue, trimmed with Broderie Anglaise.

Gigi types a little later in life, with choice of boats plain or check. For as long as you can remember, films have influenced fashions very strongly, but not for a long time has a picture inspired a show. It's appropriate that a sailor-style dress should be of drip-dry material, this one in sheen cotton. Finally, a lovely wedding dress, of Peu D'Ange, with nylon tulle frills at the back. There's a husband, too, but he's incidental.

All very lovely, but where's that husband got to? He'll turn up when he's wanted!
