RACE CARS ON SHOW

Car racing was in the spotlight at the Horticultural Hall. A Ferrari stood polished and glistening by a Lotus, the motorcar that's very much to the fore, in road and track events. Something new in sportscar design is achieved by the Marcos. The integrated body-chassis unit is of spruce marine plywood, with fibreglass panels. They say it holds the road like glue, producing a safe and effortless 110 miles an hour.

The Ferrari Berlinetta, a champion tourer, alongside a Cooper 500.

Here, every conceivable spare part and modification for the racing and sportscar enthusiast. And now meet the Bond formula junior racing car. Engine in the front, AND front wheel drive.

World champion Jack Brabham. This is the way to go motoring. No parking metres, no speed limit, Get a real driving thrill. Just step on it and see.
