## PRESS INFORMATION

On Monday, 16th October 1961, The Martin-Baker Aircraft Co., Ltd., in conjunction with the Royal Navy, Walter Kidde Co., Ltd., and R.F.D. Co., Ltd., are conducting a demonstration of their new rocket assisted ejection seat.

The purpose of this demonstration is to show that an unconscious or injured pilot can, once he has initiated the ejection, be safely lowered by his parachute into the sea where his dinghy will inflate and lift him out of the water, the whole sequence being entirely automatic.

The demonstration will take place at 15.30 hours from an aircraft lighter approximately 300 yards off - shore and adjacent to Stokes Bay Pier, near Lee-on-Solent, Hants. It will be watched from the shore by over seventy Air Attaches and high ranking officers of the various N.A.T.O. Air Forces.

You are cordially invited to attend and, should you require any further information, please do not hesitate to contact the Press Liaison Officer at the above address.

G.P. Green.  
Press Liaison Officer.
