

COMMENT ON AMERICA'S RESUMED H TESTS

The Tests now under way in the Pacific are being conducted solely for the purpose of improving the military posture of our country. And by doing that to assist our allies and yes also to improve the position of the neutrals even though they may protest these tests. Because if this world becomes dominated by the Soviet there will not be any neutral nations left in the world. = 50FT.

To those who say we already have enough nuclear weapons to blow the world apart, let me merely point out that the purpose of these tests are to develop new weapons that will be usable at the critical moment. We will never use all of our nuclear weapons should we be in an all out war, but we must have the right weapons at the right place and at the right time. This is the importance of continued testing in light of the Soviet progress: = 45 FT.
