NEW STREAMLINED TRAIN SERVICE - NEW YORK TO MIAMI

From the air, Miami salutes in smoke the arrival of the winter's inaugural streamline service from New York. Side by side and 25 hours out of New York, the Champion and the Henry M. Flyer roll into Miami. It's the first trip of the streamliners from Gotham to the south. With such luxurious travel accommodation with the war cutting tourists off from Europe, Florida looks forward to entertaining more than two million visitors from the north during the coming season. A modern caravan in stainless steel, the trains are bringing the first of an expected two hundred million tourist dollars to America's riviera in the southland.
