

40/13

KING AND QUEEN IN THE WEST COUNTRY.

His Majesty in the uniform of a Field Marshal, pays a visit to a factory where they turn out the famous Lysander Monoplane - - This machine has several unusual features. It will fly at two hundred and thirty m.p.h. or go so slowly that it appears to be hovering.

On the following day, the King, accompanied by the Queen, visited a works where Blenheims, Beauforts and other famous machines, are turned out... Their Majesties displayed great interest, in all they saw; the Queen, in her usual charming way often pausing to speak with the workmen.

Later Their Majesties met and chatted to Fifteen Captains of the British Merchant Navy; men who, from day to day, risk their lives in bringing food and war supplies, from every corner of the Globe.....This is a day that will long be remembered by all concerned.
