

NEW TRACTOR DEMONSTRATED

One way we can help to win this war, is to grow more food.

And here's the latest machine to help the farmers.

Its an amazing light new tractor, so simple to drive, its easy even for an eight year old boy. And all the normal farm tools can be clipped to the back without extra wheels.

Here you see it at work, in a space too small even to turn a normal plough and horse team. But the new tractor cultivates every square inch of it. It looks as if they've got something there.
