WHAT TO DO IN AN AIR RAID.

When you hear the sirens or anti aircraft guns, you must get under cover at once. You must not stand staring up at the sky.... that is the most dangerous thing to do. Take cover at once..... but there's no need to rush. If you take things quietly.... you will prevent panic in others. If you are in the open with no cover lie down..... preferably in a ditch.

If you are within five minutes of your home... go home. And keep away from the windows.

If you are in a car, get off the main road... and leave it clear for the Defence Service. For the same reason... park as near the curb as possible.... and if you are motoring at night !.....

Never forget to carry your gas masks. Always remember to see that your black out is as black as soot.... But the most important rule of all... is never to stand staring at the sky.

If you don't take cover.... you may get hurt.
