PICTURE PARAGRAPHS FROM THE WORLDS NEWS

We are proud to present Lieutenant Barrett of the R.A.S.C... and his eight year old French Protege, Jacques Verger. Lieutenant Barrett found Jacques in the battlefields of the Somme. His father has been killed, and his mother was unable to get him away from danger. So then and there Lieutenant Barrett adopted the boy and has brought him safely back to Britain.

And we are proud too of the Hero of Manchester. His home street is decorated to welcome twenty one year old Private Harry Place..... the man who saved more than a hundred of his comrades in Flanders. Single handed... he held a fortified ridge against the enemy, until the others could get away. Then he too escaped, and now he's engaged to Miss Sadie O'Hate, and very nice too.

Just a few days leave, and then Private Harry Place is ready to fight on.

From America come news of a new type of Helicopter, invented by the famous designer Igor Sikorsky. It's especially cheap to build, and suitable for mass production. In fact Mr. Sikorsky thinks the American factories could turn it out in thousands. And does it work?. Remember, that a machine like this requires no take off, and it can land on a sixpence. In fact the pilot could put himself down at any point, that he had sighted from the sky. The Americans claim that such a machine available in large numbers, might somehow be used for landing troops behind enemy lines.
